Getting hot under the collar?

- Take control of your process with WATLOW Controllers

Watlow designs and manufactures all thermal system components - heaters, sensors, controllers and software, offering you the ease and assurance of a single source partner. Sensemaster, as a distributor for Watlow, can offer this service and support at a local level.

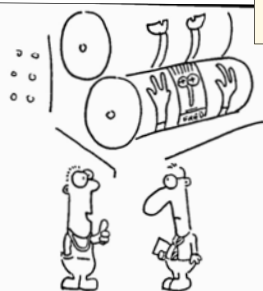

Only £566

Ultrasonic Level Control

The Miniflex programmable level controller provides a simple low cost solution to level control of liquids, slurries and pastes up to a measuring range of 6 m. There is a multi-programmable display for distance, level or percentage, and the controller provides two fully programmable relays, an analogue output and integral pump routines for duty/standby and duty/assist. Transducers are certified for Zones 1 and 2.

Do you have "pressing" safety issues?

Leaders in Machine

Light Curtains  
Area Scanners  
Safety Relays  
Interlocks

The latest C/M 2000 and C/M 4000 safety light-grids are IP67 and are insensitive to temperature fluctuations, standard detergents and cleaning processes. They can be operated between 0...+55°C and at 95% humidity.

## News Letter

### The "Genie"

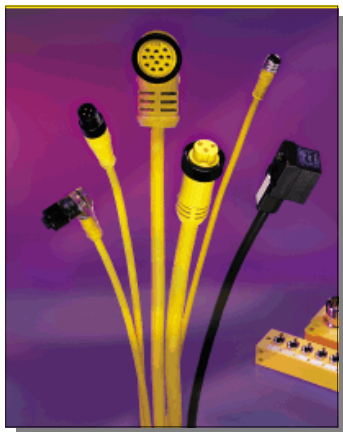

Connect your sensor or volt-free contact to the input terminals of the "Genie". (No setting or adjustment required). Connect the DC supply, then select the output terminal that you require and connect it to your machine or panel input.

PNP - A = Normally Open  
 B = Normally Closed  
 NPN - C = Normally Closed

And we also supply sensors from :-

Pepperl + Fuchs	IFM
Skana-a-Matic	EGE
Pulsotronic	Sunx
Matsushita	Turck
Sensopart	Festo
Contrinex	Leuze
Datalogic	Elesta
Sensorik	Omron
Migatron	Banner
Proxister	Visolux
Rechner	Crouzet
Synatrel	Di-soric
Baumer	Euchner
Balluff	Wengler
Seeka	Takenaka
Takex	Bernstein
Selet	Honeywell
Telco	Schönbuch
Aeco	Allan Bradley
IMO	Carlo Gavazzi
Dis	Telemecanique

### Connecting Leads

3, 4 and 5 pin M8 and M12 leads. Both straight and 90° angled are held in stock.

### Sensor Tester

The Sensemaster sensor tester enables you to check the operation of a 3 wire dc proximity sensor and determine whether it has a PNP or NPN output.
